

Andrea Scott

November 25, 1967 – November 12, 2014

On November 12, 2014, a cherished friend and member of our community, Andrea Scott lost a courageous eighteen month battle with cancer (a rare bile duct cancer called intrahepatic cholangiocarcinoma). Andrea was the loving wife to Financial Engines employee Jason Scott, and a wonderful mother to her two sons William and Andrew.

In celebration of her life and to honor her memory, we are initiating a fund-raising campaign for the Cholangiocarcinoma Foundation. Both Jason and Andrea have been very active in the organization and Jason now serves on the Foundation's Board of Directors.

In 2015, the Foundation will establish the "Andrea Scott Memorial Research Fellowship". The grant will award \$50,000 to young investigators who propose groundbreaking advances in cholangiocarcinoma research. Priority will be given to novel studies that lead to earlier and more accurate diagnosis and increased survival rates for patients. Please consider making a contribution to this important initiative in Andrea's memory. The Scott family and their friends thank you for honoring Andrea's memory by accelerating research for this devastating disease.

Cholangiocarcinoma Foundation Research Fellowships *\$200,000 to be awarded in 2015*

Promotes multi-institutional cooperation with open access
in the research community

Provides critical funding to promising physician-scientists to foster
commitment to the study of cholangiocarcinoma

Research Funded in 2014 *Mayo Clinic*

\$80,000 for Genome Wide Association Study
\$15,000 for International Hepatobiliary Neoplasia Biorepository

MD Anderson

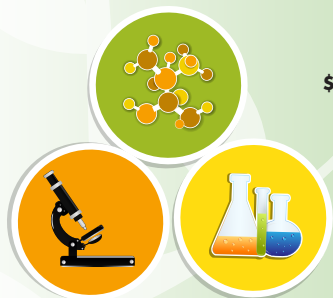

\$50,000 for Targeting BAP1 in Cholangiocarcinoma

MSKCC/UCSF/Vanderbilt

\$38,825 for Study of 2nd Line Chemotherapy
in Advanced Biliary Cancer

Conquer Cancer Foundation

\$60,000 for Young Investigator Award

International Cholangiocarcinoma Research Network (ICRN)

Promotes clinical and translational research
and increases access to clinical trials

Identifies specific areas of expertise within the
ICRN institutions and engages key stakeholders

Prioritizes research areas, avoids unnecessary duplication
and reduces regulatory burden involved in network studies

International Cholangiocarcinoma Patient Registry (ICPR)

The **only** registry of patient health information
related solely to cholangiocarcinoma

Accelerates research for early detection,
diagnosis, new treatments and ultimately
a cure for cholangiocarcinoma

Book: 100 Questions & Answers about Biliary Cancer

Guides patients and their families through
diagnosis, treatment, and survivorship

Available **free** both e-copy and print versions
at cholangiocarcinoma.org
